Medtech buyers pay for growth: ~9x revenue above 20% growth, ~6x below

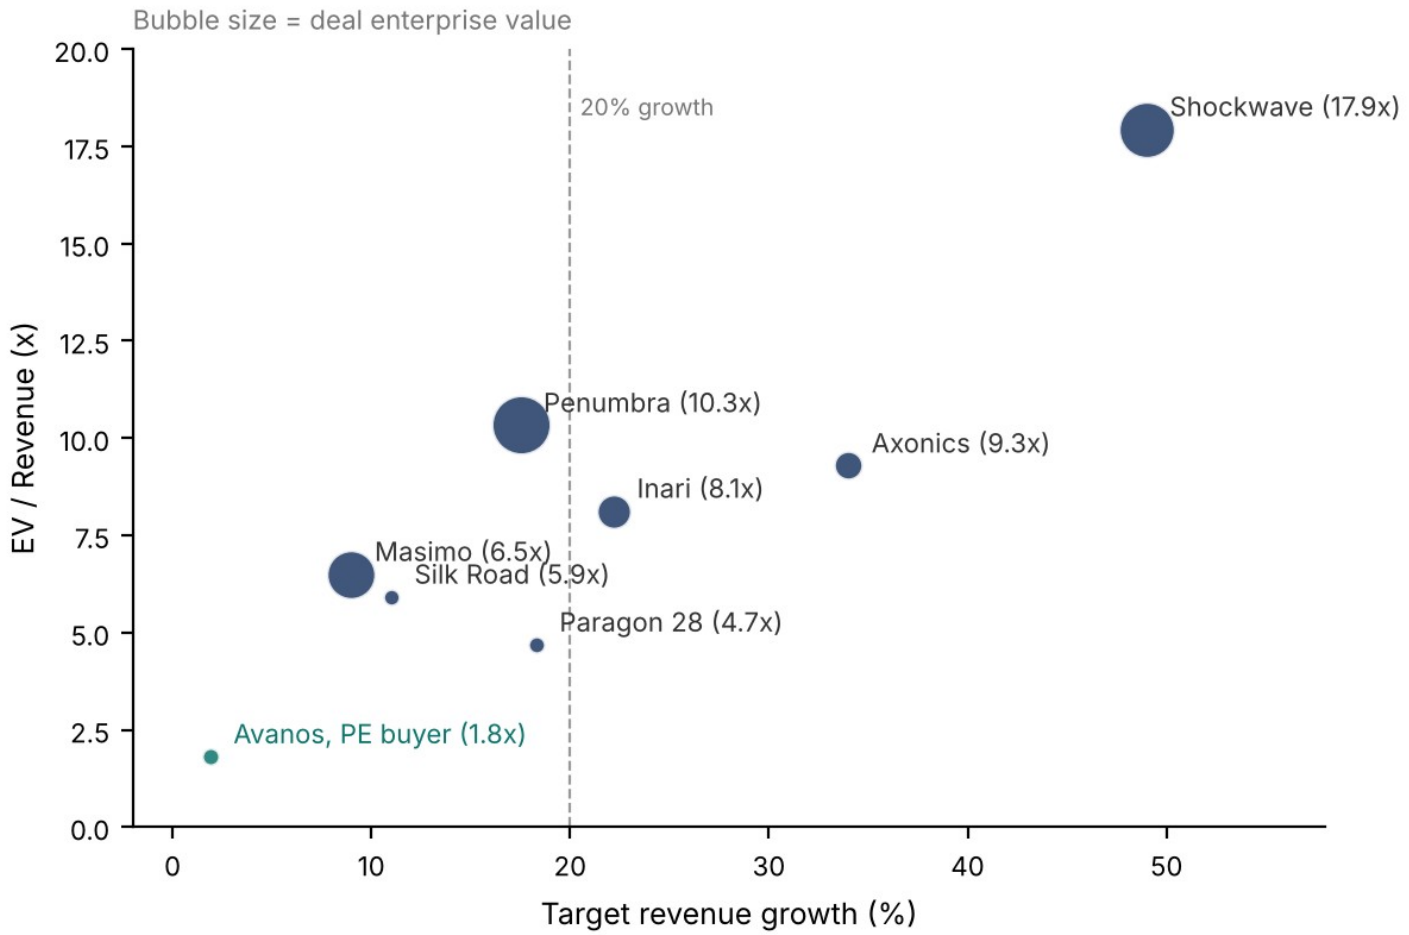

Eight public medtech takeovers, 2024 to 2026 ($ in millions)

Deal	Announced	Target segment	EV	Revenue	Growth	EV / Rev.	Premium
J&J / Shockwave Medical	Apr 2024	Cardiovascular	$13,100	$730	49%	**17.9x**	>5%
Boston Scientific / Axonics	Jan 2024	Urology / neuromodulation	$3,400	$366	34%	**9.3x**	23%
Stryker / Inari Medical	Jan 2025	Peripheral vascular	$4,900	$603	22%	**8.1x**	60%
Boston Scientific / Penumbra	Jan 2026	Thrombectomy / neurovascular	$14,500	$1,404	18%	**10.3x**	19%
Zimmer Biomet / Paragon 28	Jan 2025	Foot and ankle orthopedics	$1,200	$256	18%	**4.7x**	8%
Boston Scientific / Silk Road	Jun 2024	Carotid / vascular	$1,160	$196	11%	**5.9x**	38%
Danaher / Masimo	Feb 2026	Patient monitoring	$9,900	$1,523	9%	**6.5x**	40%
AIP / Avanos Medical (PE)	Apr 2026	Pain management / digestive health	$1,272	$701	2%	**1.8x**	72%
Strategic median					**18%**	**8.1x**	**23%**

Revenue is the latest full year at announcement (Silk Road uses 2024 guidance; Axonics and Masimo use preliminary results). Premiums are versus prior close, except Silk Road (60-day VWAP). Shockwave's premium is understated because reports of talks lifted the stock first. Penumbra was cash and stock; Paragon 28 adds a CVR of up to $1 per share.

Growth drives the multiple; private equity prices on cash flow

Revenue growth vs. EV / Revenue; correlation of 0.86 across strategic deals (0.51 excluding Shockwave)

Three takeaways

1. Growth sets the multiple. Targets growing 20%+ sold for a median 9.3x revenue versus 6.2x for slower growers. Shockwave (49% growth, 17.9x) shows how far a category leader with a new technology can stretch the range.

2. Strategics pay for fit. Boston Scientific bought three vascular and urology assets in three years, and paid 10.3x for Penumbra on 17.5% growth, reflecting how it fits BSX's vascular business.

3. Private equity prices on cash flow. AIP paid 1.8x revenue but 14.7x adjusted EBITDA for a 2%-growth Avanos, and paid the highest premium in the set (72%) over Avanos's prior close.

So what for a sell-side banker: lead the pitch with the growth story and line up strategics that have a portfolio gap before going to sponsors.
