# Docebo: Priced for the Base Case

At $29.95 the market pays 2.65x FY2027E revenue; upside depends on reported growth catching up to 13% underlying ARR growth

## Company Overview

Docebo (Nasdaq/TSX: DCBO) sells subscription software for enterprise learning, skills intelligence and workforce training, including programs for customer and partner networks.

## Key Operating Metrics

| Q3 2026 | Reported |
|---|---|
| ARR | $261.5m |
| ARR growth (underlying*) | 11.0% (13.4%) |
| Revenue growth | 14.1% |
| Gross margin | 79.3% |
| Adj. EBITDA margin | 23.7% |
| FCF margin, 9M 2026 | 17.9% |
| FY2026 revenue guidance | $276.7m |

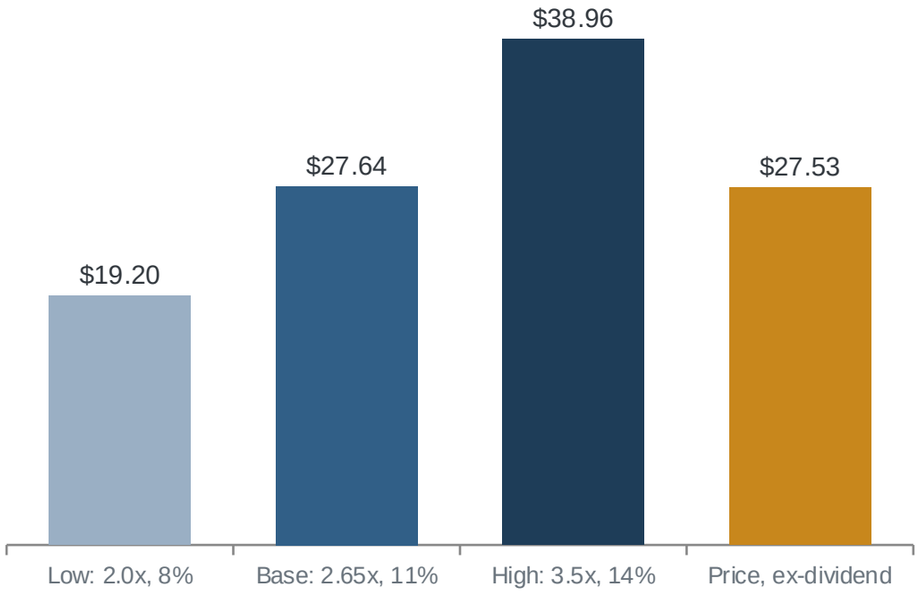

*Excludes the largest OEM customer and acquired ARR, constant FX.

## Value per Share vs. Current Price

**Base case: $27.64 per share**

vs. $27.53 ex-dividend price ($29.95 less the $2.42 special dividend). Range: $19.20 to $38.96.

FY2027E EV/revenue multiple and revenue growth

## Investment View

**Priced for the base case.** The current price equals 11% growth at today's 2.65x multiple.

**Upside needs reported growth to rise.** The largest OEM fell to 2.1% of ARR, so the 13.4% underlying rate should start to show.

**The premium to peers is earned.** Learning peers trade near 1x on flat to single-digit growth.

## Key Risks

**OEM churn:** largest OEM went from 6.2% to 2.1% of ARR in a year.

**Leverage:** the $60m special dividend lifts net debt to about $106m.

**Acquired growth:** about $9m of 2026 revenue is from 365Talents. AI tools could pressure pricing.

Sources: Docebo Q3 2026 results and earnings call (Nov 6, 2026); Docebo FY2025 results (Feb 27, 2026); share price is Nasdaq close on Nov 3, 2026. USD millions unless stated.

# What the Price Implies vs. Learning Peers

Docebo already trades at about 2.5x the peer group; the premium rests on double-digit growth and 20%+ margins

## Market-Implied Valuation

| USD millions except per share | Value |
|---|---|
| Share price, Nov 3, 2026 | $29.95 |
| Diluted shares (m), Q3 2026 | 25.6 |
| Equity value | 767.5 |
| Add: net debt, Sept 30 (88.2 debt, 42.5 cash) | 45.7 |
| **Enterprise value** | **813.2** |
| EV / FY2026 revenue guidance | 2.94x |
| EV / FY2027E revenue (base, 11% growth) | 2.65x |
| EV / FY2026 adj. EBITDA guidance | 14.6x |
| EV / FY2027E adj. EBITDA (base, 23% margin) | 11.5x |

The price still includes the $2.42 special dividend (payable Nov 30), so this uses pre-dividend net debt. The model on the next page uses pro forma net debt and the ex-dividend price.

## Learning Software Peers

| Company | Revenue growth | Adj. EBITDA margin | EV / revenue |
|---|---|---|---|
| **Docebo (DCBO)** | **14% (≈10% organic)** | **20%** | **2.65x** |
| D2L (DTOL) | 6% to 8% | ~15% | ~1.0x |
| Skillsoft (SKIL) | (3.5%) | ~14% | ~1.1x |
| Coursera (COUR) | n/m (Udemy merger) | ~14% | ~0.2x |

Docebo: FY2026 guidance, forward EV/revenue. D2L: FY Jan-2027 guidance, EV/2027E sales (MarketScreener). Skillsoft: TTM revenue and EBITDA, EV ≈ $0.55bn (StockAnalysis). Coursera: 2026 guidance, EV ≈ $0.2bn as of Aug 2026 (Eulerpool). Peer figures are approximate and from different dates; verify on Bloomberg or FactSet.

## Takeaways

**Peers set a floor, not a target.** D2L, Skillsoft and Coursera are growing slowly or shrinking, so their ~1x multiples cap the downside case rather than define fair value.

**The market is not ignoring Docebo's quality.** At 11.5x FY2027E EBITDA it already pays for growth. A higher value needs evidence that growth is accelerating, not just steady.

# Valuation Model, Bridge and Cross-checks

Scenarios vary FY2027 growth and the EV/revenue multiple; the equity bridge includes the $60m special dividend

## Scenario Valuation

| USD millions except per share | Low | Base | High |
|---|---|---|---|
| FY2026 revenue guidance | 276.7 | 276.7 | 276.7 |
| FY2027 revenue growth | 8% | 11% | 14% |
| FY2027E revenue | 298.8 | 307.1 | 315.4 |
| EV / FY2027E revenue | 2.0x | 2.65x | 3.5x |
| Enterprise value | 597.7 | 813.9 | 1,104.0 |
| Less: pro forma net debt | (105.7) | (105.7) | (105.7) |
| Equity value | 492.0 | 708.2 | 998.3 |
| **Value per share (25.6m diluted)** | **$19.20** | **$27.64** | **$38.96** |
| vs. $27.53 ex-dividend price | -30% | +0% | +42% |

**Low:** OEM drag and the 365Talents lap slow growth to 8%; the multiple moves toward peers.

**Base:** revenue grows with ARR (11%) at today's market multiple.

**High:** underlying 13.4% ARR growth shows in reported results; 3.5x is still below the ~5x Docebo traded at in early 2025.

## EV/EBITDA Cross-check

| FY2027E | Low | Base | High |
|---|---|---|---|
| Adj. EBITDA margin | 21% | 23% | 25% |
| Adj. EBITDA | 62.8 | 70.6 | 78.9 |
| Implied EV / EBITDA | 9.5x | 11.5x | 14.0x |

Margins step up from 20% FY2026 guidance and 23.7% in Q3. D2L trades near 14.5x 2027E EBITDA (multiples.vc, June 2026).

## Value per Share Sensitivity

| EV / revenue | 8% growth | 11% growth | 14% growth |
|---|---|---|---|
| 2.0x | $19.20 | $19.85 | $20.49 |
| 2.65x | $26.78 | **$27.64** | $28.50 |
| 3.5x | $36.69 | $37.83 | $38.96 |

The multiple matters more than growth: moving one step across a row changes value by about $1, while moving one step down a column changes it by $7 to $11.

Pro forma net debt = 88.2 borrowings - 42.5 cash + 60.0 special dividend = 105.7 (management cites ~$108m).
